## Education

### National Teachers College

Bachelor of Science in Information Technology

Quiapo, Manila - Present

## Experience

### Savvy Pet Spa (Pet Grooming Software)

#### Customer Support Associate & Lead Gen Specialist

January 2025 – January 2026

- Managed comprehensive customer support channels including live help chat, facilitating prompt resolutions for a UK-based pet grooming software client.
- Conducted live sales demonstrations via Google Meet to showcase software utility, effectively converting prospects into active users.
- Executed lead generation strategies to identify and qualify pet grooming businesses across the United States, expanding the potential client base.
- Identified and reported software bugs to the development team to ensure platform stability and optimize user experience.
- Facilitated customer success calls and managed refund processes to maintain high levels of client satisfaction and retention.
- Administered spreadsheet management tasks to organize client data, sales pipelines, and operational metrics.

### Duke Energy (Electric Company)

#### Customer Support Associate

July 2023 – January 2025

- Resolved complex billing disputes for a major US-based electric utility provider, ensuring accurate account adjustments and customer clarity.
- Executed sales calls to promote and upsell surge protection insurance and other utility-related value-added services.
- Negotiated payment arrangements and clarified usage discrepancies to reduce account delinquency and enhance customer trust.

### Dish Network (Cable Provider)

#### Customer Support Associate & Tech Specialist

July 2022 – July 2023

- Addressed and resolved high-volume billing inquiries for US-based customers, ensuring accurate payment processing and account maintenance.
- Upsold premium DVR equipment and upgraded programming packages, consistently contributing to revenue growth.
- Served as a Technical Specialist, diagnosing and resolving complex cable and TV connectivity issues via phone.
- Utilized remote access tools to troubleshoot receiver systems directly, minimizing the need for technician dispatch and reducing service downtime.
